

Séjours montagne

DÉCOUVERTE DE LA RANDONNÉE GLACIAIRE AU DÔME DE LA LAUZE

From 25/08/24 at 25/08/24

Le programme de cette journée est spécialement conçu pour les personnes souhaitant s'initier en douceur à la marche sur un glacier. Vous réaliserez l'ascension du dôme de la Lauze à 3559 m dans un environnement de haute montagne d'exception avec tout autour de vous les sommets majeurs du massif des Écrins : le Râteau, la Meije, la Barre des Écrins, le Mont Pelvoux et les Ailefroides.

Nous vous proposons aussi cette prestation en engagement privé le jour de votre choix, entre amis ou pour votre famille, prix sur demande. D'autres dates que celles proposées sont disponibles sur demande, nous contacter.

- Level : Level 1: Beginner
- Mountain range : Oisans, southern Alps
- 1 day
- 3 - 6 personnes (reste places)
-

Prices : from 140,00 €

Booking are made on a 3 participants basis, i.e. €175/person. If there are 5 or 6 participants on the day of departure, we apply a degressive rate (140€/person) and refund the difference of 35€ at the end of the stay.

- Dates:

From 25/08/2024 at 25/08/2024

[Check out the dates for other trips](#)

Your trip day to day

LA GRAVE-LA MEIJE CABLE CAR - COL DES RUILLANS - COL DE LA LAUZE

We meet at the departure point of the Glaciers de la Meije cable cars in La Grave.

The guide welcomes you and checks your bags and equipment.

If you need to hire equipment, it's best to do so the day before (shop open until 7pm) so that you can catch the first lift on the La Grave cable car the D-day to the Col des Ruillans at 3211m, the starting point of our ascent.

We set foot on the Girose glacier to gear up and rope up. We then head for the Col de la Lauze at 3211m, where the exceptional panorama allows us to see all the main peaks of the Ecrins National Park in a single view: Barre des Écrins 4102m, Mont Pelvoux and Les Ailefroides, both close to 4000m.

We'll catch the cable car before it closes for the descent back down to the valley.

Picnic or hot meal possible on the way back to the Col des Ruillans and, weather permitting, you can visit the ice cave and its surprising sculptures.

Altitude difference: 300 m

End of our trip late afternoon in La Grave.

NB : The programme is intended as a guide only. It could be modified at any time by the mountain guide for safety reasons, weather conditions or regarding the physical and technical level of the participants.

ROC ÉCRINS - 6 rue du Chlorate - Zone Les Sablonnières - 05 120 L'ARGENTIÈRE-LA BESSÉE - .

Tél : 04 84 13 14 08 <https://www.roc-ecrins.com> roc.ecrins@gmail.com

ROC ÉCRINS ORGANISATION - Eurl au capital de 8 000€ - Garantie financière : Groupama Assurance-Crédit-contrat n°4000718199/0 - Immatriculation ATOUT FRANCE : IM005230003 - R.C.P : HISCOX contrat n°HA RCP0399794 - Code APE 7912Z - RCS de GAP SIRET : 979 424 918 00014 - N°TVA intracommunautaire : FR42 979 424 918

The aim of this day is to give you a gentle introduction to mountaineering while climbing a summit with an exceptional panorama. You'll learn how to use crampons and an ice axe, and discover the rules of high-altitude roped climbing.

min/max people

6 participants maximum. **Departure is guaranteed from 3 participants.** You will be notified at least 48 hours before departure in the event of cancellation. Where possible, an alternative solution will be offered.

NB : For cancellation conditions for privatised trips (made up groups) please refer to our [conditions of sale](#).

Equipment : gear and clothing

Personal equipment

Hiking in high mountain requires being able to cope with all weather and environmental conditions which can change very quickly. Appropriate equipment guarantees safety and represents an essential part of the success and comfort of your climb/stay.}

You will not necessarily use all the items on this list which but you must nevertheless have them in your bag.

All of this equipment is technical and generally quite expensive. **Please note that we offer some of this equipment for rental, they are indicated by a * in the list below, you will find rental prices in the "Gear rental and extras prices" section. Please note, the mountaineering kit that we offer for rental only includes individual technical equipment (mountaineering boots, crampons, ice axe, harness, helmet); clothing (gore tex jacket, soft shell fleece, goretex pants) are not part of it.**

Equipment hire and changes to your booking are only possible before payment of the balance of your booking (45 days before departure). **We advise you to take the time, upon registration, to list the equipment you already have. No equipment initially rented from ROC ECRINS and not taken or used on the day of departure will be refunded.**

Important, if you have your own personal equipment: the legislation regarding P.P.I. (personal protective equipment, this is the helmet, harness, and sunglasses) limits the use of the equipment over time. They can be used for 5 years from the date of purchase. Beyond this date, your equipment is considered to no longer be up to standard. You can find all the information regarding P.P.E. here > www.inrs.fr

Headwear

At high altitudes, snow reflects UV rays and the sun's rays are not as well filtered by the atmosphere; even a cloudy sky allows 90% of UV rays to pass through, so it is essential to protect yourself against the dangers of the sun.

- A pair of class 4 protection sunglasses is highly recommended for everyone and very strongly recommended for sensitive eyes. They'll come in handy on a ski holiday too.
- Sun cream high protection (index 50 recommended) for face and lips; remember to take the smallest size possible (no large tubes)
- a cap for the approach walk (prefer a soft model with no large seams that can be worn under the helmet)
- a ski mask (**indispensable** in case of gusts of wind or snowfall)
- a beanie hat that can be worn under the helmet (without pompoms)

- a helmet* approved for mountaineering (5 years max since date of purchase)
- a neck gaiters or Buff(avoid scarves)
- a headlamp with loaded batteries!!!

Bodywear

When making a prolonged effort at altitude, the principle is to be able to layer different garments according to the intensity of the effort and the weather conditions (temperature, wind, snowfall, rain), in order to stay as dry as possible.

NB: ski clothes are not suitable because they are often too warm, too heavy and not very breathable.

Upper body

- First layer: a long-sleeve base layer in a breathable, quick-drying material such as merino, wood fibre..., cotton to be avoided(to protect you from UV rays and for safety in the event of a fall).
Second layer: a lightweight fleece or soft shell jacket*. Ideally, it should be windproof and breathable. Put it on as soon as the temperature cools, usually when you arrive on the glacier.
- Third layer: a warm, compressible down jacket (synthetic or down, -10°C protection). It will keep you warm during a long stop on the route, at the summit while you take photos, on the refuge terrace, and sometimes even while walking in very cold weather.
Fourth layer: a gore tex* windproof jacket to protect against rain and snow. This is the waterproof jacket that keeps you dry in bad weather. It must be lightweight and breathable.
- a mountaineering harness* (5 years max from date of purchase)

Lower body

- a thin pair of tights in fleece or cotton, ideally $\frac{3}{4}$ so as not to make the socks too thick. You'll need them in case of very cold weather, and you can put them on at the hut at the start of the ascent if necessary. You can also use it as nightwear.
- Mountaineering trousers: mountaineering trousers are water-repellent, windproof, breathable and hard-wearing. You can also take hiking or trekking trousers that aren't too light (as long as you have a gore tex overtrouser to put over them). **NB: mountaineering trousers are not available for hire**
- an overtrouser* in GoreTex or equivalent material: these are very light trousers that you put over your trousers in case of rain, wind or snow. They have zips along the legs, so you can put them on quickly at any time without having to remove your shoes.

The hands

- a pair of thin gloves in fleece, softshell or leather for the climbs to the refuge.
- one pair of thicker gloves like ski gloves
- a pair of VERY WARM Mittens (if your ski gloves aren't warm enough), which you'll put over the thin gloves when you get to the top and for the descent.

Footwear

- Mountaineering boots* (crampon-compatible): these boots are different from hiking boots. They are rigid, which will enable you to crampon on ice while providing good support for the ankle and crampons. They must also be waterproof and offer excellent protection against the cold.
- Hiking or mountaineering socks : these should be warm and well-fitting and high enough to rise above boot level to avoid overheating. One pair is enough for a 48-hour mountain run. You can also take a pair of very light mini-socks to put on in the refuge in the evening while your pair of technical socks dry.
- a pair of crampons* **with anti-boot** in good condition and sharp, suitable for your boots,
- a mountaineering ice axe* light and long, suited to your height, it should almost reach the ground when in your hand with your arm extended alongside your body.
- gaiters* which will keep your feet dry in fresh snow; they also prevent crampon points catching on the bottom of your trousers.

NB: all refuges provide slippers, so you don't need to take extra shoes.

Guide's tip for 48-hour tours: as most of the time the refuge is reached on footpaths, you can plan to go up and down in trail trainers (soles with crampons) to protect your feet from the heat that can be caused by the rigidity of mountaineering boots (you'll need to have your mountaineering boots in your bag). You can leave your

trainers at the refuge before setting off on the climb and pick them up on your return.

This adds weight, but it can be very useful for those with sensitive feet - the choice is yours...

And last but not least

- Telescopic walking poles* with snow washers (8 cm minimum diameter). Not compulsory but highly recommended; they will help you on the way up and take the strain off your knees on the way down.
- water : make sure you have enough water for around 2 litres, ideally a one-litre plastic bottle plus smaller ones (around 25 cl) to keep warm and close to your body in your jacket. Water bags are not suitable for use at high altitude because they freeze! You can use them, but only when going up to the refuge.
- energy food (cereal bars, dried fruit...depending on your habits),
- small thermos 500ML max (not compulsory, a hot drink can be comforting but it adds weight...)
- camera: prefer a small size that you can slip into your pocket, no need to bring a large camera that risks being damaged. Besides, with the cold the battery would be empty very quickly.
- small first aid kit adapted to your personal needs, also containing elastoplast and double-skin dressings for any blisters. If you are taking medication, take only the number of tablets you need. Pack a few paracetamol tablets as it's not uncommon to suffer from headaches when at altitude.
- micro Toilet Bag: just the bare essentials (toothbrush, mini tube of toothpaste...) and, very important, earplugs for a good night's sleep in the refuge.
- a bed liner (meat bag): compulsory for nights in refuges. All the refuges are providing pillows and duvets but these are obviously not washed after each passage.
- a bin bag to isolate your wet stuff in case of rain or a waterproof overbag.
- documents always useful to have with you in a small waterproof bag: ID proof, references of your assistance insurance if you haven't taken out the policy we offer.
- A small amount of cash for personal expenses (drinks, etc.) in the refuges (most of the refuges don't accept payment by credit card).

And remember, all of the above must fit into:

- A mountain rucksack* of around 35 litres (40 litres max) with ice axe holder and chest strap. The filled rucksack should not exceed 10 kg, including technical equipment (crampons, harness, helmet). Remember that weight is the mountaineer's enemy. Once you've packed your rucksack, there should still be room for a picnic!

You should also bring a second bag (such as a soft travel bag) to store the items you don't need for the nights at the refuge and to leave in your car.

High mountain : special warning

IMPONDÉRABLES

La pratique de l'alpinisme est soumise à différents éléments que nous ne pouvons parfois ni anticiper, ni maîtriser ; nous pouvons par conséquent être amenés à modifier le programme de nos séjours haute montagne pour diverses raisons :

- Si la météorologie et/ou les conditions nivologiques ne permettent pas de réaliser le programme prévu et/ou
- s'il survient un retard dans l'ouverture ou une fermeture anticipée d'une remontée mécanique,

dans ces cas nous vous proposerons un programme alternatif parfois le jour même du départ.

NORMES D'ENCADREMENT

ROC ÉCRINS - 6 rue du Chlorate - Zone Les Sablonnières - 05 120 L'ARGENTIÈRE-LA BESSÉE - .

Tél : 04 84 13 14 08 <https://www.roc-ecrins.com> roc.ecrins@gmail.com

ROC ÉCRINS ORGANISATION - Eurl au capital de 8 000€ - Garantie financière : Groupama Assurance-Crédit-contrat n°4000718199/0 - Immatriculation ATOUT FRANCE : IM005230003 - R.C.P : HISCOX contrat n°HA RCP0399794 - Code APE 7912Z - RCS de GAP SIRET : 979 424 918 00014 - N°TVA intracommunautaire : FR42 979 424 918

Les conditions de la montagne évoluent au cours de l'été et peuvent parfois modifier les normes d'encadrement pour chaque ascension. Les normes d'encadrement définissent le nombre de personnes que le guide de haute montagne peut encadrer pour chaque course ; elles sont définies en fonction des capacités d'assurance qu'autorisent la difficulté et les conditions du moment et peuvent donc être modifiées en cours de saison. Ces modifications peuvent avoir des répercussions sur le prix du séjour ou sur le programme envisagé. Votre inscription à un de nos séjours ou ascensions, sous-entend votre acceptation de ces éventuelles modifications.

RISQUES OBJECTIFS

La pratique de l'alpinisme vous expose à des risques aléatoires mais réels en particulier aux avalanches, chutes de pierres, chutes en crevasses, températures très basses....Pour limiter ces risques, il est indispensable de respecter les consignes de sécurité données par l'encadrant. Vous devez en être conscient(e) et accepter ces risques lors de votre inscription.

Health condition

No medical certificate required to take part in our trips, but it may be useful to check with your doctor that you have no contraindications (particularly in the case of chronic illness) to physical activity in the high mountains.

If you are undergoing any particular treatment, please let us know so that we can take appropriate measures if necessary.

Altitude can cause acute mountain sickness **when you are not sufficiently acclimatised**, also known as AMS. In most cases, it is accompanied by headaches, nausea and a general feeling of discomfort, but in the most serious cases it can lead to pulmonary or cerebral oedema, requiring an immediate descent.

That's why it's always a good idea, before any ascent or high altitude stay wherever possible, to do some hiking in the mountains or medium mountains, especially for those who live at sea level.

Skills and stamina level

The aim of this day is to introduce you to the world of the high mountains. To make the most of it, you need to be physically prepared. Even if the altitude difference and ascent time are reasonable, the altitude, the equipment (rucksack, mountaineering boots, etc.), are all factors that will increase the effort you have to make during the climb.

If you are a good hiker or regularly practise an endurance sport, this is the ideal preparation. If you don't, we recommend that you train in the weeks leading up to your trip: brisk walking (ideally on a path with a positive elevation), cycling, running, swimming (at high intensity)... any sport that helps you increase your cardio-respiratory capacity is ideal.

Guiding

By state-certified mountain guides or trainees mountain guides (aspirant guides) from the Roc Écrins team. They will have a VHF radio connected to the emergency services, a satellite phone or a mobile phone. They will also have a collective first-aid kit.

*A trainee mountain guide is a guide in training who is authorised to work and supervise climbs from their third year of training. They are not beginners, as it takes several years of practice and training to build up a list of

routes and have the experience and technical level required to enter the mountain guide training course.

Insurances

To take part in one of our stays, you must be properly insured for the chosen activity (rescue and repatriation costs) in the event of an incident or accident occurring during the stay. (We strongly recommend that this also includes cancellation cover). It is your responsibility to check the cover provided by your personal insurance policy. If you do not have such an insurance, you can take out the EUROP ASSISTANCE contract when you sign up. The amount of the "ASSISTANCE" insurance covering repatriation, rescue and search costs represents 2.4% of the price of the stay. MULTIRISK" insurance covering assistance, cancellation, loss of luggage and interruption of holiday, represents 5.6% of the price of the holiday.

Meeting point

At 8 am **in front of the Glaciers de la Meije cable car at La Grave**. We recommend you arrive the day before if you have hire equipment to collect.

Getting there

- TGV connection, Paris-Turin. Get off at Oulx then take the shuttle to Briançon and La Grave.
- TGV connection, Paris-Valence or Paris-Grenoble with bus connections
- Night trains from Paris and the East of France. Information www.sncf.connect.fr
- from Nice, Marseille or Gap, regular bus services (www.autocars-scal.fr - 04 92 51 06 05)

If you are coming by car,

- From the north, take the A48 motorway to Grenoble, then direction Briançon to La Grave (RN91).
- From Italy, take the A43 Maurienne motorway through the Fréjus tunnel, then the Col de Montgenèvre. Drive through Briançon towards Grenoble.
- From the south, take the A51 motorway to La Saulce, then head for Briançon (RN 94). Follow the road signs to Grenoble via the Lautaret pass.

Price

tous les tarifs

nbe participants	Price per person
3	175,00 €
4	175,00 €
5	140,00 €
6	140,00 €

Booking are made on a 3 participants basis, i.e. €175/person. If there are 5 or 6 participants on the day of departure, we apply a degressive rate (140€/person) and refund the difference of 35€ at the end of the stay.

The price includes:

- **Mountain guiding service**
- The cable car ticket

The price doesn't include:

ROC ÉCRINS - 6 rue du Chlorate - Zone Les Sablonnières - 05 120 L'ARGENTIÈRE-LA BESSÉE - .

Tél : 04 84 13 14 08 <https://www.roc-ecrins.com> roc.ecrins@gmail.com

- Picnic and energy food for the day (cereal bars, dried fruit...)
- Personal expenses: snacks, drinks, etc
- Individual technical equipment rental (mountaineering boots, crampons, ice axe, harness, helmet)
- Liability, repatriation and cancellation insurances
- Transport to and from meeting point and during the stay

Any other expenses not mentioned under the above section “the price includes”.

How to book

To book your trip :

- complete the **pre-registration form** online
- You will receive a **booking contract** by email. It sets out the details of your booking as well as the schedule and payment terms.
- On receipt of this contract, **the deposit of 30%** must be paid within 4 days in accordance with the terms and conditions set out in the contract. Your registration can only be confirmed when the deposit has been paid.
- The balance must be paid 45 days before the departure. Please note that any balance not paid within 45 days of departure will be considered as a cancellation of your booking. Financial withholding would therefore be applied in accordance with our terms and conditions of sale.
- For a booking made less than 45 days before departure, the total amount of the booking must be paid on receipt of the booking contract in accordance with the terms and conditions set out therein.
